

Haskap Canada Association

A New Berry ☺

HASKAP is the Japanese name for *Lonicera caerulea*. It has also been known as 'Blue Honeysuckle', 'Honeyberry', 'Edible Honeysuckle' and 'Sweet Berry Honeysuckle'. There are a few commercial size orchards and many more being planted. It is an exciting time to be part of a new and growing berry industry.

Haskap Canada Association (HCA) is a not-for-profit national organization that was developed out of the necessity to have one common entity that producers, plant breeders and consumers could contact for information and assistance.

PRIME DIRECTIVES

- ✚ To promote the production and marketing of Haskap in Canada and abroad.
- ✚ To assist our members in finding processing and marketing opportunities for Canadian grown Haskap.
